## YOUR Pets NEIGHBORHOOD

### PETS: Frankie Asks - "Has Spring Arrived Yet?"

Frankie is a seven-year-old dachshund. She lives on Martin Avenue in Kittanning and enjoys playing in the yard. She was adopted by her human sister Mataya. To feature your pet in the Kittanning Paper, text your photo and information to 724-525-5605 or email to admin@kittanningpaper.com

## Lenape Tech Invites the Community to Their Spring Open House Tonight

Lenape Technical School will open its doors tonight to not only prospective students and parents, but also the community at large.

Administrative Director Wes Kuchta said their Spring Open House is aimed at younger students and their families these days.

"Unlike in the past, it was only for students that were planning on coming the following year. This year, we are opening our doors up to the entire community." Kuchta said the State is emphasizing career awareness as this year's initiative.

"We are now focusing on sixth, seventh, and eighth graders who are beginning to have conversations with their families of what they want to do when they get older."

Kuchta said instead of a tour or single presentation, the school is totally open in every one of their technical areas for everyone to see.

"We have a lot of different events going on that will appeal to the various age groups."

Cosmetology students will conduct a fashion show at 6PM, there will be raffles and door prizes, and various emergency vehicles will be outside for students to experience through a "touch-a-truck" event."

"We want everyone to visit our technical areas, ask whatever questions you have, and understand exactly what we have to offer, and have conversations of what is best for students in the future."

Kuchta said it is important for families to discuss educational options long before graduation.

Lenape Tech will host its Spring Open House tonight from 5:30 until 8:00 PM. The community is invited to come and experience 14 different technical shops, as well as a fashion show, raffles, and door prizes.

"When it comes to preparation for any trade or a career, we have students who are making those decisions younger and younger. It is really about exposing them to different careers. We know kids change their mind and can vary year to year. The more exposure they have to various careers, the earlier they will make informed decisions on their future with their parents."

Kuchta said there are fourteen technical areas: Advertising/Digital Technology, CADD Pre-Engineering, Welding, Law Enforcement, Collision Repair, Culinary Arts, Natural Resources, Allied Health/Sports Medicine, Precision Machining, Automotive Tech, Computer Information Technology, Cosmetology, Construction Trades, and Biomedical
